**SPRINKLER TANKS**

Country: **Estonia**  
Application: **Fire water**  
Size of tank: **610 m3**  
Implementation year: **2023**

Country: **Estonia**  
Application: **Fire water**  
Size of tank: **586 m3**  
Implementation year: **2023**

Country: **Finland**  
Application: **Fire water**  
Size of tank: **500 m3**  
Implementation year: **2023**

Country: **Finland**  
Application: **Fire water**  
Size of tank: **660 m3**  
Implementation year: **2023**

Country: **Finland**  
Application: **Fire water**  
Size of tank: **295 m3**  
Implementation year: **2023**

Country: **Norway**  
Application: **Fire water**  
Size of tank: **680 m3**  
Implementation year: **2023**

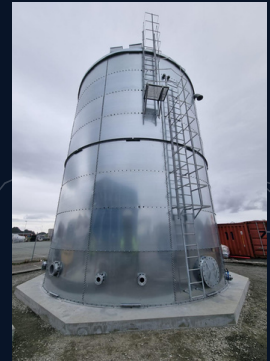

**SPRINKLER TANKS**

Country: **Norway**  
Application: **Fire water**  
Size of tank: **540 m3**  
Implementation year: **2022**

Country: **Norway**  
Application: **Fire water**  
Size of tank: **320 m3**  
Implementation year: **2023**

Country: **Norway**  
Application: **Fire water**  
Size of tank: **120 m3**  
Implementation year: **2023**

Country: **Norway**  
Application: **Fire water**  
Size of tank: **150 m3**  
Implementation year: **2023**

Country: **Norway**  
Application: **Fire water**  
Size of tank: **495 m3**  
Implementation year: **2023**

Country: **Norway**  
Application: **Fire water**  
Size of tank: **525 m3**  
Implementation year: **2023**

## SPRINKLER TANKS

Country: **Sweden**  
Application: **Fire water**  
Size of tank: **450 m3**  
Implementation year: **2022**

Country: **Latvia**  
Application: **Fire water**  
Size of tank: **2 x 198 m3**  
Implementation year: **2023**

## SPRINKLER TANK UPGRADE

Country: **Norway**  
Application: **Fire water**

**FROM:** Size of tank: **300 m3**  
No of rings: **6**  
Built: **2021**

**TO:** Size of tank: **466 m3**  
No of rings: **9**  
Upgrade year: **2023**

The customer needed to increase the amount of water required for the firefighting system and due to limited space, it was decided to increase the existing storage tank by increasing its height.

**SPRINKLER TANK MEMBRANE  
CHANGE**

Country: **Estonia**  
Application: **Fire water**  
Size of tank: **300 m3**  
Implementation year: **2023**

Changed the membrane for old fire water storage tank built by a foreign company to prevent water leakage.

**STORAGE SOLUTIONS**

Country: **Latvia**  
Application: **Wastewater**  
Size of tank: **550 / 150 / 100 m3**  
Implementation year: **2023**

Country: **Lithuania**  
Application: **Process water**  
Size of tank: **2 x 110 m3 and 1500 m3**  
Implementation year: **2023**

**MB HOLDING**

**Design - Production - Installation**  
Bolted steel tanks and membranes

## STORAGE SOLUTIONS

Country: **Latvia**

Application: **Potable water**

Size of tank: **5 tanks x 25m<sup>3</sup>**

Implementation year: **2023**

Potable Water Tank coupled with a separate water cleaning system, offers military units a compact and durable solution for ensuring access to clean drinking water in remote or deployed operations.

## PROJETS WE ARE PROUD OF

Country: **Puerto Rico**  
Application: **Fire water**  
Size of tank: **880 m<sup>3</sup>**  
Implementation year: **2020**

Country: **Latvia**  
Application: **Slurry tank**  
Size of tank: **9800 m<sup>3</sup>**  
Implementation year: **2019/2020**

Country: **Norway**  
Application: **Anaerobic digestion**  
Size of tank: **8 pcs 522 m<sup>3</sup>**  
Implementation year: **2021**

Country: **Italy**  
Application: **Biogas storage tanks, were supervised and assembled by our team**  
Size of one tank: **5 pcs 5000 m<sup>3</sup> (each)**  
Implementation year: **2022**
